

The illustration shows the front of a house with a warm, orange-brown color palette. At the top, there are three gabled roof sections. The left and right gables each contain a window with a wooden frame and a cross-shaped mullion. The central gable features three smaller, arched windows. Below the roofline, a large, light-colored rectangular sign with a double-line border is centered on the wall. The sign contains the text 'ЧЕТЫРЕ БРАТЦА' in a bold, dark, sans-serif font. On either side of the sign, there is a small, circular porthole window with a decorative element below it. The main entrance consists of a large, arched wooden double door with vertical paneling and two small horizontal handles. Flanking the door are two windows, each with a wooden frame and a flower box underneath containing red and green plants. The entire scene is rendered in a stylized, hand-drawn manner with visible brushstrokes and outlines.

A painting of a landscape. In the background, a mountain range is visible under a sky filled with large, billowing white and blue clouds. The middle ground features rolling green hills and fields. In the foreground, there are several large, grey rocks. Two small, brown animals, possibly sheep or goats, are grazing in the field. The overall style is impressionistic, with visible brushstrokes and a vibrant color palette.

Четверо братцев есть у числа,  
Мирно соседствуют рядом:  
Один все теряет,  
Второй возвращает,  
Третий всегда все преумножает,  
Четвертый по-братски на всех разделяет –  
Им ссориться вовсе не надо.

В зеленом кафтане  
И с трубкой во рту  
Рачительный хозяин  
Всегда на посту.

Толстяк и здоровяк –  
Кровь с молоком,  
Он знает лишь слово «прибавить!»,  
С другими словами он не знаком.

$$10 = 5 + 5$$

$$10 = 6 + 4$$

$$10 = 3 + 7$$

Это лучшая истина в мире!
